 Scenario Gas Leakage Monitoring and Alerting	 Entice How does someone initially become aware of this process?	 Enter What do people experience as they begin the process?	 Engage In the core moments in the process, what happens?	 Exit What do people typically experience as the process finishes?	 Extend What happens after the experience is over?
 Steps What does the person (or group) typically experience?	<div>Searching Gas Detection System</div> <div>Most customers discover Gas detection & alerting system for their industries</div> <div>Visit Website</div> <div>To fill up their information in the website for registration</div> <div>Checking Of quality</div> <div>How durable it is - Worthful for such amount price</div>	<div>Scan QR code</div> <div>QR code is scanned through mobile phone to enter into the website</div> <div>Checking of reviews of product</div> <div>Looking how other end users feels about the product</div>	<div>Gas and temperature Detection</div> <div>Leakage of gas & temperature is detected through sensor</div> <div>Fire Detection</div> <div>Interface of OpenCV technology detects fire ignition</div> <div>Database</div> <div>The data about the leakage is stored in IBM cloud</div>	<div>Website</div> <div>The final output of detected parameters are shown in website</div> <div>Writing & Submitting Review</div> <div>The customers writes a review and gives the rating out of 5</div> <div>Post data appears in user profile</div> <div>Previous records of customer is stored in IBM cloud</div>	
 Interactions What interactions do they have at each step along the way?	<div>Discovering of gas detection system section on the website</div> <div>Services and additional measures of gas leakage</div> <div>To make sure the proper gas flow without leakage</div>	<div>Product reviews are seen in website</div>	<div>Checking the industry site for proper placement of sensor</div> <div>Rainwater Sprinkler is actuated after the detection of fire ignition</div>	<div>The website is interfaced with Node-Red</div> <div>"Leave a review" modal window within the profile on the website</div>	<div>Completed experiences section of customer is stored on the website</div>
 Goals & motivations At each step, what is a person's primary goal or motivation?	<div>Helping workers who work in gas, chemical industries, etc</div> <div>Help me have more information about the usage of website</div> <div>Help me to reduce the impact (or) hazard caused due to leakage of gas</div>	<div>Help me have the product with good feelings</div>	<div>Help me to detect the temperature and gas leakage</div> <div>Help me to prevent further spreading of fire</div> <div>Help me to save the industrial properties and life of employees</div>	<div>Help me to understand the website with ease</div>	<div>Help me see what I've done before</div>
 Positive moments What steps does a typical person find enjoyable, productive, fun, motivating, delightful, or exciting?	<div>It's collective idea of having enough time for escaping from the hazardous place</div> <div>It's fun to access the webpage as it has easy interface</div>	<div>It is more reliable as the gas leakage information can be send to the person whenever scanned the QR code</div> <div>It's reassuring to read reviews written by past customers</div> <div>It is secured as it provides access only to the authorized persons</div>	<div>It's productive as it measure toxic gas in very low concentration</div> <div>It is accurate & precise</div> <div>It's competent as it helps to prevent the high risk of gas explosions and affecting any casualties within and outside the premises</div>	<div>It's fantastic as it has wireless technology</div> <div>It's helpful as it shares the location of the gas leaked area</div> <div>It's easy to access the system 24/7</div>	<div>It's splendid as it stores the data history</div>
 Negative moments What steps does a typical person find frustrating, confusing, angering, costly, or time-consuming?	<div>It's frustrating to search related products in the websites</div>	<div>Damage of the components is an erratic case</div>	<div>It's costly as it requires a regular maintenance for proper function</div> <div>It's so confounding as it is influenced by moisture</div>	<div>People describe leaving a review as an arduous process</div>	
 Areas of opportunity How might we make each step better? What ideas do we have? What have others suggested?	<div>Website shouldn't be complicated</div> <div>Website information can be send to the user once signed in</div>		<div>Continuous monitoring of room temperature for detecting favourable conditions for spontaneous ignition of gases</div> <div>It's versatile as it can also used in house as a LPG gas detector</div>	<div>Developing proper user website after evaluating the reviews of end users</div>
